

## MODEL K

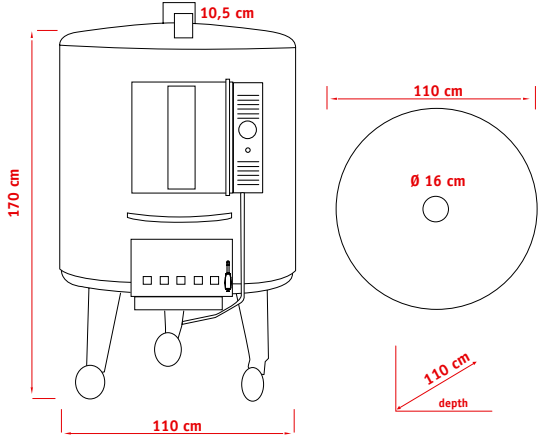

The idea and the features of this oven are so unique to deserve the patent, the first model was produced in 1983 by the PEVA company. This model is different because of the round cooking chamber with rotating floor. We recommended to place it in large and covered spaces, both for the positioning, but also to have enough space for the handling.

# OVEN MODEL **K**

**FOR INDOOR**

<b>K20</b>
